

MASK MAKING

I would like to invite you to make your own masks. I am attaching templates that you can use, or you can design your own. Be creative!

There are just a few things that you will need; cardboard (a cereal box is great as it's not too hard to cut), scissors, glue, pencil and a choice of your favourite things to add colour: markers, paints, crayons, etc.

If you decided to use a stencil, simply stick it to your card, and cut it out. (It may be fiddly, so if you need help with cutting the eyes, ask for help.) Remember that scissors are sharp! Start decorating it, be brave and adventurous; if you choose a zebra make her pink or green! Don't stick to traditional colours, add patterns and designs.

Once your mask is ready you can attach string or a stick like in the pictures (you can use sellotape for sticking).

Have fun, and remember to share with us your creations !
